

Kaiser Permanente Riverside Medical Center
Blood Order/Release During Hemorrhage Protocol Form

Order and Release

Process:

1. **CALL THE TRANSFUSION SERVICE Extension [4067]**
2. **Say** “This is (*your name*) from Labor & Delivery/OR/ED, we need blood products on (*Patient Name and MRN #*). Please use extension ***** for call back information.”
3. **Verbalize** the doctor’s name, the type of product(s), and number of units to be released.
4. **Wait** for read-back from Transfusion Service staff for confirmation.
5. **Complete this form** and take with you to transfusion service. This form will act as a pick-up (release) document.
6. **Draw a Type and Screen** specimen on the patient and send to the Transfusion Service STAT
7. The transfusion service will start the release process when item 4 is completed, blood product(s) will be ready to pick up within **10 minutes**.
8. **Important: always confirm patient wristband matches patient sticker on bag.**

Patient Sticker OR Handwrite Patient Name and MRN #
--

Ordering Physician _____

RN _____

Transfusion Service will determine the appropriate type blood for the patient
